GREAT INCREASE IN BANK DEPOSITS

Wheat Advances and Speculation for Saturday Was Active.

KILLING FROST IN THE WEST

In Nebraska It Was Dry, With Minimum Temperature at 20. Snow in Texas.

NOW YORK, April 21.-Influenced mainly by further unfavorable weath. er and crop reports, wheat advanced.

a Saturday, shorts ecvering free-ly and commission houses buying. The market was again flooded with damage reports. Those from Southe ... Kan-

market was again flooded with damage reports. Those from Southe... Kcasas were rather sensational, some claiming that the damage ranged 10 to 40 per cent, with the probability of further damage unless rain and warmer weather occurred in the near future. It was dry and cold in that State yesterday, freezing temperatures being reported in some sections.

In Nebraska, too, it was dry and minimum temperatures of 20 degrees were reported, killing frosts were reported in the Ohio Valley States and Missouri. Rain and snow occurred in Texas, and Oklahoma, but this had no effect, and neither did predictions of rain or snow for the Missouri Valley.

Low temperatures were report d at the Northwest and despatches from that section regarding the outlook for spring wheat seeding were sything but cheerful.

On the other hand the cash 'emand fell off sharply, the receipts continued on a large scale, the cables were rather disappointing, some recent buyers took profits and some of the crop reports were favorable. A crop expert wired from Lincoln, Neb "Wheat small, but looking fine. Plenty of moisture. No bugs"

But it was in the main a weather, market, and with the shorts plainly nervous the bearish features of the news had no weight, Chicago reported active buying by large commission houses, and the opinion was expressed by not a few that unless Kansas gets good rains in the near future a further advance in prices is likely to the withessed, it is stated that Nicolet, of Kansas City, who has hitherto taken a hopeful view of the crop outlook, admits that his reports are becoming bad. Some are predicting that the fortheoming Okiahoma State report will show that from 50 to 75 per cent, of the crop has been seriously damaged.

The Northwestern receipts for the week were more than 3,000 cars lar-

cent, of the crop has been seriously damaged.

The Northwestern receipts for the week were more than 3,000 cars larger than for the same week last year, Broomhall estimates the world's shipments at 12,000,000 bushels against 9,872,000 last week, and 9,256,000 last year.

9.872.000 last week, and 9.256,000 last year.

Liverpool advanced 1-8 to 3-8d. Influenced by covering, the Modern Miller report, and advance on the Continent and a good demand for off coast and on passage cargoes. Lyle. "Enough has occurred to winter wheat to justify an estimate under 400,000,000 bushels. Turning to spring wheat, the prominent feature is the lateness of the scason for seeding. This may mean there will be no increase of acreage and the loss winter wheat has sustained not be overcome by a greater production of spring. A bullish featuriles in the fact the greater attention paid to raising durum wheat is displacing wheat suitable for flour. Conditions in Russia are in favor of a demand on us the coming season for what mand on us the coming season for wha durum wheat we raise. It is in Russia, I think, I see a strong feature in our favor. The price obtainable for our surplus usually determines the price of all. Our surplus is sold to Europe with Russia our largest competitor. The less the competition, the better the price opportunity. Russia will enter a new season with reserves nearly exhausted. To replenish them and satisfy all home requirements is rather more than one requirements is rather more than one good crop can do if there is a continuance of exports. To my thinking Russia is presenting probabilities to encourage a believer in good prices the coming season. Blessed with Russian abundance for a few seasons in succession there is coming a change in which it may prove our turn to sell Europe freely. Crop conditions in Russia are not yet very favorably treated, but it must be remembered the greater production is of spring wheat regarding which not much can now be said."

Corn advanced owing to the rise in wheat, light receipts, small offerings, covering of shorts and commission house buyling. Country acceptances were light. Chicago reported shipping sales on Friday of 750,000 bushels. Charters were reported yesterday for 250,000 bushels. Livergool advanced 1-4 to 3-8d.

Onts advanced owing to the rise in large and the country acceptances.

Enormous Expansion in Loans Last Two Weeks Is Shown in Statements.

THE SURPLUS IS DECREASED

Shifting of Funds from Out-of-Town Institutions to Local Banks Explains Change.

NEW YORK, April 21 .- Further remarkable increases in the loan and deposit accounts of the Clearing-House banks were shown in the weekly bank statement yesterday. The increase in loans as reported yesterday amounted to \$25,247,800 and deposits increased \$26,501,600. These increases, coming ord-breaking increases in the two accounts last week, furnished an interesting topic of conversation yesterday as to the sources and causes of the changes. It will be recalled that the bank statement last week showed an increase in loans of \$36,968,000 and deposits increased to the extent of \$44,-948,000. The increases in these two items for a fortnight have amounted to \$62,300,000 in loans and \$71,500,000 in deposits, a showing which has never been equaled.

Not Yet Explained.

Not Yet Explained.

Excepting the payments on the American Telephone and Telegraph Company bond underwriting, which involved \$30,000,000, there was no important corporate financing during the week which might explain the continuance of the expansion in both loans and deposits. In the previous week the payments of 40 per cent on the \$60,000,000 Great Northern stock issue was used as a basis of explanation for the chormous expansion recorded last week, but there was a reservation by the leading banking element that these two factors would not necessarily create the big increases in loans and deposits. The theory which finds most favor in banking circles explaining the expansion is that out-of-town banks, as well as trust companies here, are depositing their funds with the Clearing-house banks, and in this way loans which were heretofore not counted in the loans of the Clearing-House are now made to show in the weekly statements of the members. This process of shifting usually occurs when money rates ease to figures which have lately prevailed.

So far as the movements of cash are concerned, the preliminary estimates were proved to be fairly accurate in the statement published yesterday. The gain in cash reported amounted to \$2,417,300. Owing to the increases in deposits, however, the reserve requirements were \$6,625,400 larger, so that the statement of condition yesterday showed a decrease in the surplus reserve of \$4,148,100. This brings the reserve down to \$11,701.

It will be recalled that the banks It will be recalled that the banks made a special effort last year to improve their condition following the San Francisco disaster, and the surplus reserve shown at this time a year ago stood at \$16,355,725. Two years ago the surplus reserve amounted to \$11,448,050.

Practically all the leading banks showed increases in loans for the week. The First National, however, exceeded all others by reporting an increase of

all others by reporting an increase of 10,466,400. The Mercantile National reported deposits of \$16.412.600 and cash reserve of \$4.372.100, or a percentage of 26.6 reserve.
